Project Overview
This invoice covers the comprehensive development of the SIRE TECH website, including frontend, backend, and deployment services. The project aims to deliver a robust, scalable, and user-friendly platform that meets all client requirements and industry standards. Our team has worked diligently to ensure that every aspect of the project is handled with professionalism and attention to detail.

Scope of Work

- Frontend Development:** Creation of responsive layouts, interactive UI components, and seamless user experience using React.js and modern CSS frameworks.
- Backend Development:** Implementation of secure RESTful APIs, database design, and integration with third-party services using Node.js and MongoDB.
- Testing & Deployment:** Comprehensive testing (unit, integration, and end-to-end), bug fixing, and deployment to a scalable cloud environment.

Deliverables

- Fully functional website accessible on all modern browsers and devices.
- Admin dashboard for content and user management.
- Comprehensive documentation for future maintenance and updates.

Timeline
The project commenced on **September 1, 2023** and is scheduled for completion by **October 15, 2023**. All milestones have been met as per the agreed schedule, and the final deployment is underway.
